

## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application.

### **Listing of Claims:**

1. (Currently Amended) A method of associating a destination document to a source document during a save operation, comprising:

defining contextual metadata of the source document, wherein the contextual metadata includes a location of the source document;

identifying a target document by a content and contextual data;

bundling the target document, and the contextual metadata of the source document as attributes of the target document;

saving a bundled target document as the destination document, the destination document being a final document that includes the target document bundled with contextual data about the source document;

wherein bundling the target document comprises merging the contextual metadata of the source document and the contextual data of the target document as attributes of the target document;

automatically synchronizing the destination document to the target document, to reflect changes in the target document; and

wherein defining the contextual metadata of the source document further includes defining the contextual metadata of the source document further includes defining a navigation path from the source document to the target document, to enable a client to return to the source document from the target document, ~~even if~~ in the event that one or more intermediate documents along the navigation path between the source document and the destination document no longer exist.

2 – 4. (Canceled)

5. (Previously Presented) The method of claim 1, wherein defining the contextual metadata of the source document includes defining the address of the source document.

6. (Original) The method of claim 5, wherein defining the address of the source document includes identifying a URL of the source document.

7. (Canceled)

8. (Original) The method of claim 5, wherein defining the contextual metadata of the source document further includes defining input parameters required to generate the target document.

9. (Original) The method of claim 8, wherein defining the input parameters includes defining an input search query.

10. (Original) The method of claim 5, wherein saving the bundled target document includes saving the destination document on a networked data repository.

11-26. (Canceled)
